About Me

I am a fashion student aspiring to work within fashion design and buying in the future. Fashion design, trend forecasting and styling is where my skills are primarily focused as well as in public communications. I have always been keen to follow a career in fashion for the diversity and expression that it inspires within myself and also within others.

The fashion industry attracts me as it can create movement and inspire within society and in my opinion is a powerful tool in making an impact today. Fashion can be fun and playful and it is a joy for me to help to inspire others to express themselves through beauty and image in a way that supports them in feeling confident and beautiful. I enjoy working within customer service. I am outgoing, social and independent. I enjoy meeting and socialising with new people and thrive when working with the public in a fast paced creative environment. Fashion Media and photography are also areas which I very much enjoy. Travel and culture is a passion of mine allowing me to grow and relate better to world trends, varying culture and to better understand the world around me. I have a good work ethic and believe in working to high standards in order to achieve the best from every experience. It is important for me to be respectful of others and enjoy working as part of a team as well as independently.
