

Sacred Symbols Print Design

Francesca Camilleri

This is a series of print designs that I developed after finding inspiration from looking at common symbols that appeared in many different ancient cultures across the world. Many of these symbols are still used and celebrated today and have formed and influenced many different areas of society across the world. Some exist within spiritual communities, some are seen within religions and churches. Many artists have looked at them and celebrated them due to their intricate detail and beauty and others are drawn towards it with belief in the power and meaning behind the symbols. For me this has been fascinating to look into and it has been a lot of fun to work with these images and develop them into more intricate patterns and designs that I can use with my own design work. I think that is a very interesting and exciting aspect of culture a way in which people have communicated their ideas and belief systems for centuries which is a truly beautiful thing.

I have also taken inspiration from the concept of the 'nature goddess' and natural spiritual symbols such as the tree of life and the flower of life celebrating nature and holistic beauty.
